Preface.....	vii
--------------	-----

Part 1: Calculators, Curricula, and Teaching: Perspectives and Issues

1. The Potential for Calculators to Transform Elementary School Mathematics	1
<i>Grayson H. Wheatley, Florida State University, Tallahassee, Florida</i>	
<i>Richard Shumway, Ohio State University, Columbus, Ohio</i>	
2. Calculators in the Middle Grades: Access to Rich Mathematics	9
<i>Nicholas A. Branca, San Diego State University, San Diego, California</i>	
<i>Becky Ann Breedlove, O'Farrell Community School, San Diego, California</i>	
<i>Byron King, O'Farrell Community School, San Diego, California</i>	
3. The Graphing Calculator: A Tool for Change	14
<i>Gail Burrill, Whitnall High School, Greenfield, Wisconsin</i>	
4. Research on Calculators in Mathematics Education	23
<i>Ray Hembree, Adrian College, Adrian, Michigan</i>	
<i>Donald J. Dessart, University of Tennessee, Knoxville, Tennessee</i>	

Part 2: Calculators in K-8 Mathematics

5. CAN: Calculator Use in the Primary Grades in England and Wales	33
<i>Hilary Shuard, Homerton College, Cambridge, United Kingdom</i>	
6. A Constructivist Approach to Developing Early Calculating Abilities	46
<i>Ian Sugarman, Shropshire Mathematics Centre, Shrewsbury, United Kingdom</i>	

7. Decimals and Calculators Make Sense! 56
DeAnn Huinker, University of Wisconsin, Milwaukee, Wisconsin
8. Concept Development and Problem Solving Using Graphing
 Calculators in the Middle School 65
*Charles Vonder Embse, Central Michigan University, Mount Pleasant,
 Michigan*
9. Calculators in the UCSMP Curriculum for Grades 7 and 8 79
*Daniel B. Hirschhorn, University of Chicago, Chicago, Illinois
 Sharon Senk, Michigan State University, East Lansing, Michigan*

Part 3: Calculators in 9–14 Mathematics

10. Personal Technology and Classroom Change: A British
 Perspective 91
Kenneth Ruthven, University of Cambridge, Cambridge, United Kingdom
11. Teaching the Line of Best Fit with a Graphing Calculator 101
Rheta N. Rubenstein, University of Windsor, Windsor, Ontario
12. Matrices + Modeling + Technology = Increased Mathematical
 Power for Students 112
*Nancy Crisler, Pattonville Public Schools, Pattonville, Missouri
 Gary Froelich, Bismarck High School, Bismarck, North Dakota*
13. Using Graphing Calculators to Investigate a Population Growth
 Model 120
*Rosalie Dance, Ballou Science and Mathematics Senior High School,
 Washington, D.C.
 Joanne Nelson, Ballou Science and Mathematics Senior High School,
 Washington, D.C.
 Zachary Jeffers, U.S. Senate Page School, Washington, D.C.
 Joan Reinthaler, Sidwell Friends School, Washington, D.C.*
14. Graphical Insight into Elementary Functions 131
Judith H. Hector, Walters State Community College, Morristown, Tennessee
15. The Power of Parametric Representations 138
Gregory D. Foley, Sam Houston State University, Huntsville, Texas
16. Super Calculators: Implications for Calculus Curriculum,
 Instruction, and Assessment 145
Thomas Dick, Oregon State University, Corvallis, Oregon

Part 4: Calculators in Mathematics Assessment

17. The Use of Calculators in Assessment of Mathematics Achievement 158
Martha H. Hopkins, University of Central Florida, Winter Park, Florida
18. Calculators in State Testing: A Case Study 167
Steven J. Leinwand, Connecticut Department of Education, Hartford, Connecticut
19. The Effects of Calculators on State Objectives and Tests 177
Joseph N. Payne, University of Michigan, Ann Arbor, Michigan
20. The Use of Calculators on College Board Standardized Tests 186
Carole Greenes, Boston University, Boston, Massachusetts
Gretchen Rigol, The College Board, New York, New York

Part 5: Strategies for the Implementation of Calculators

21. Calculators Add Up to Math Magic in the Classroom 195
Karen W. Finley, Washington, D.C.
22. Implementing Calculators in a Middle School Mathematics Program 200
Gary G. Bitter, Arizona State University, Tempe, Arizona
Mary M. Hatfield, Arizona State University, Tempe, Arizona
23. Implementing Calculators in a District Mathematics Program: Three Vignettes 208
Doug Super, Vancouver School District, Vancouver, British Columbia
24. Statewide In-Service Programs on Calculators in Mathematics Teaching 217
George W. Bright, University of North Carolina, Greensboro, North Carolina
Patricia Lamphere, University of Montana, Missoula, Montana
Virginia E. Usnick, University of Nevada, Las Vegas, Nevada
25. Introducing Calculators in Swedish Schools 226
Hans Brolin, University of Uppsala, Uppsala, Sweden
Lars-Eric Bjork, Sunnerboskolan, Ljungby, Sweden

Part 6: Calculator Activities for the Classroom

26. Five Steps to Zero	233
Squares	234
<i>Doug Williams</i> , Bimbadeen Heights Primary School, Mooroolbark, Australia	
<i>Max Stephens</i> , Ministry of Education, Melbourne, Australia	
How Much Simpler Can You Get?	235
Bull's Eye	236
<i>George W. Bright</i> , University of North Carolina, Greensboro, North Carolina	
<i>Patricia Lamphere</i> , University of Montana, Missoula, Montana	
<i>Virginia E. Usnick</i> , University of Nevada, Las Vegas, Nevada	
Press On!	238
Guesstimate: High/Low	239
<i>C. J. Dockweiler</i> , Texas A&M University, College Station, Texas	
<i>Jane F. Schielack</i> , Texas A&M University, College Station, Texas	
Wipeout—Refined	239
<i>Martha H. Hopkins</i> , University of Central Florida, Winter Park, Florida	
Calculators and Reading Numbers	240
<i>Valerie J. Malkus</i> , Nanuet, New York	
Geometric Sequences, Squaring, and Square Roots	241
Three Approaches to the Golden Ratio	243
<i>Alfinio Flores</i> , San Diego State University, San Diego, California	
Continued Fractions	244
<i>Lida Garrett McDowell</i> , University of Southern Mississippi, Hattiesburg, Mississippi	
Index	247
